

Vibrating Discharger

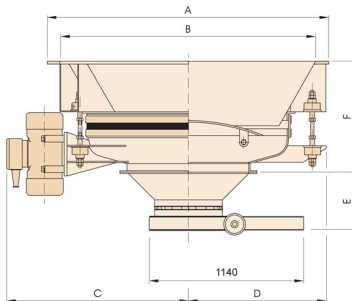

AMVD

Function:

- Discharging powdered materials (dusty products) from reinforced concrete, metal or fiberglass silos
- Particular shape of both bottom and top of the diaphragm, the suspension system, the intensity and the frequency of vibrations are the result of a long experience and ensure a continuous smooth flow of every type of bin .

Main Features:

- No bridging
- Rat-holing elimination
- No erratic flow in discharge
- Complete discharge of the blend
- Possibility of application on existing bins
- Low cost of operation and maintenance
- Noiseless operation and high reliability
- Standard construction in painted carbon-steel
